RoboRoll Coatings

Robotic Interior Painting for Faster Construction Finishing

FASTER
Reduce painting time by 30-60%

SAFER
Keep crews out of repetitive work

MORE CONSISTENT
Deliver uniform quality every time

Automating the most repetitive work in construction.

02 THE PROBLEM

Painting is still manual

TIME-CONSUMING
Repetitive work takes hours per room.

INCONSISTENT QUALITY
Results vary with fatigue, reach, and conditions.

LABOR SHORTAGES
Hard to find and keep skilled painters.

Delays cost **time.** Delays cost **money.**

Delays Impact Every Project

SLOWER TURNOVER

Manual painting extends project timelines and delays move-ins.

HIGHER COSTS

Labor and schedule delays drive up costs on every unit.

EVERY BUILDING NEEDS IT

Interior painting is required in every residential and commercial construction.

Even small efficiency gains **scale across thousands of units.**

Meet RoboRoll

A robotic painting system built for interior construction

AUTOMATED WALL COVERAGE
Precisely follows paths for complete, repeatable coverage.

CONSISTENT QUALITY
Uniform finish every time—independent of fatigue.

ONE OPERATOR
Designed to be supervised by a single worker.

Purpose-built to deliver faster, safer, and more consistent interior painting.

Faster
Reduce painting time by 30–60%.

Safer
Minimize ladder use and worker strain.

Cleaner
Better control reduces overspray and waste.

Built to Scale
Start with painting—expand to more finishing tasks.

Proven in Simulation

RoboRoll completes complex painting tasks with precision and efficiency.

Multi-Wall Coverage

Automatically transitions between walls with smooth path planning.

Curved Path Execution

Follows continuous curved trajectories for smooth, even paint distribution.

Multi-Surface Adaptability

Handles corners, edges, and ceilings with consistent coverage.

Simulation validates accuracy, coverage, and efficiency
Real-world testing in progress.

98.7% Path Accuracy

95.2% Coverage Uniformity

30–60% Time Savings

RoboRoll is Purpose-Built to Solve Interior Painting

We focus on one high-impact task—and do it better than anyone else.

1 FOCUSED

One task. Perfected.

We focus exclusively on interior painting to deliver maximum accuracy, reliability, and value.

Deep specialization leads to superior performance.

2 PRACTICAL

Built for real job sites.

RoboRoll is designed for the messy, variable, fast-paced environments of real construction projects.

Rugged, reliable, and easy to use on any job site.

3 SCALABLE

A platform for the future.

Our technology can expand beyond painting to other finishing tasks—unlocking new markets over time.

Start with painting. Grow into finishing automation.

ROBOROLL
COATINGS

THANK YOU!

We appreciate your time and consideration.

RoboRoll is redefining interior painting with automation, precision, and performance—built for the future of construction.

PRECISE
Consistent, high-quality results

SAFE
Reducing risk and protecting people

PRODUCTIVE
More output with less downtime

SUSTAINABLE
Better for the jobsite and the environment

ADDITIONAL MATERIALS

The following slides (9–14) provide deeper insights into RoboRoll's capabilities, features, and specifications.

DETAILED SPECS

Technical data and performance metrics

KEY FEATURES

In-depth look at safety, automation, and more

CUSTOMIZATION

Options and accessories to fit your jobsite needs

> **Let's dive deeper.** Slides 9–14 ahead.

Built for Precision. Designed for Jobsites.

RoboRoll combines smart hardware and intelligent software to deliver consistent, high-quality results.

PRECISION PATH PLANNING
Advanced algorithms generate optimal paths for complete, repeatable coverage.

AUTOMATED SPRAY CONTROL
Maintains consistent distance, speed, and flow for a smooth, uniform finish.

REAL-TIME SENSING
Sensors monitor position and environment to adapt and maintain accuracy.

INTELLIGENT SOFTWARE
User-friendly interface for easy setup, job control, and real-time monitoring.

BUILT-IN SAFETY
Speed limits, soft stops, and obstacle detection keep worksites safe.

MOBILE & COMPACT
Easy to move, set up, and operate in tight interior spaces.

High Accuracy
Precise coverage every time.

Consistent Quality
Uniform finish from edge to edge.

Greater Efficiency
Complete more work in less time.

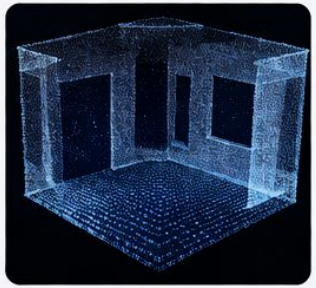
Lower Costs
Reduce labor, rework, and material waste.

Simple. Smart. Seamless.

RoboRoll combines robotics and software to automate interior painting from start to finish.

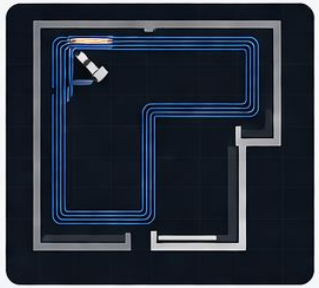
1 Scan & Understand

3D sensors scan the space to detect walls, windows, and obstacles.



2 Plan the Path

Advanced algorithms generate the most efficient painting path.

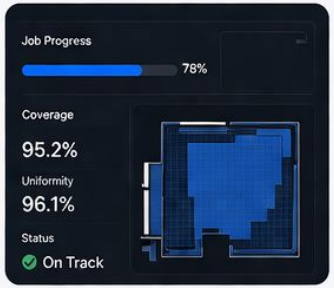


3 Paint with Precision

RoboRoll follows the path with consistent speed, distance, and flow.

4 Monitor in Real Time

Software monitors progress, coverage, and quality in real time.



5 Complete & Review

Consistent, high-quality finish delivered—ready for inspection.

Designed for real job sites.

Minimal Setup
Start painting in minutes.

Easy to Use
One operator. Full control.

Adapts Anywhere
Works in different room sizes and layouts.

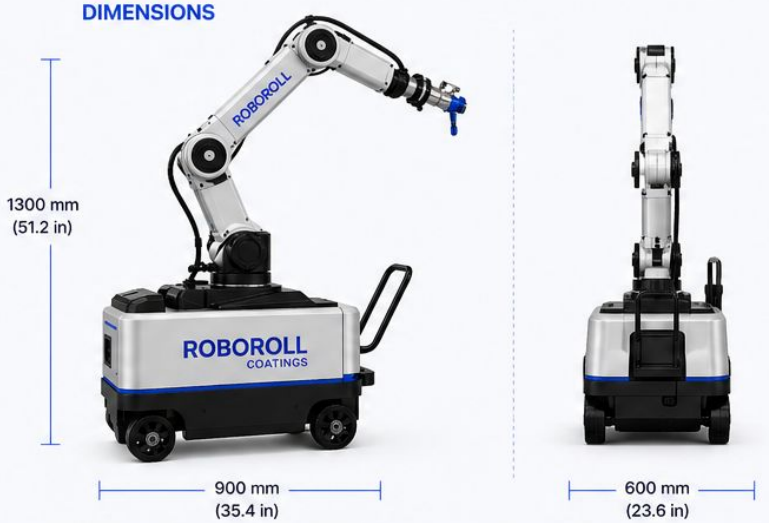
Consistent Results
Perfect coverage, every time.

Engineered for Performance.

RoboRoll is built with advanced technology and rugged components to deliver reliable, high-quality results on every job.

SPECIFICATION	DETAILS
Painting Technology	Airless Spray Painting
Movement	Autonomous Mobile Base + 6-Axis Robotic Arm
Coverage	Walls, Corners, Edges, Ceilings
Max. Spray Height	3.2 m (10.5 ft)
Arm Reach	1.5 m (4.9 ft)
Spray Speed	Up to 10 m²/min (107 ft²/min)
Paint Compatibility	Water-based & Solvent-based Coatings
Battery Life	4–6 Hours (Typical)
Charging Time	2.5 Hours
Weight	~120 kg (265 lbs)
Connectivity	Wi-Fi, Bluetooth, 4G (Optional)
Safety Features	LIDAR, Ultrasonic Sensors, E-Stop, Soft Stops
Operating Environment	Indoor Construction Sites

DIMENSIONS



Payload	Max. Pressure	Max. Flow Rate	Noise Level	Operating Temp.
5 kg (11 lbs)	2200 psi (151 bar)	2.0 L/min (0.53 gal/min)	< 70 dB	5°C – 40°C (41°F – 104°F)

Built to Perform. Built to Last.

Rugged & Reliable
Built for tough jobsite conditions.

Low Maintenance
Fewer parts, less downtime.

High Uptime
Designed for all-day operation.

Quality Assured
Tested to meet industry standards.

Start with Apartment Turnovers.

Apartment turnovers are the ideal starting point for RoboRoll—delivering immediate value in a high-frequency, high-impact market.

Repeatable layouts

Standardized unit designs enable fast, predictable painting.

Tight timelines

Turnovers demand speed—RoboRoll delivers consistent results, fast.

High volume demand

Thousands of units turn over every month—perfect for scalable impact.

Expansion Markets

RoboRoll's platform is built to expand beyond apartments into other high-value interior painting markets.

Commercial Interiors

Offices, retail, and hospitality spaces.

New Construction

Large-scale projects with consistent demand.

Facility Maintenance

Ongoing upkeep for properties and portfolios.

A Massive Market. Built for Growth.

RoboRoll targets the $7B+ interior painting market, with significant room to expand.

TOTAL ADDRESSABLE MARKET (TAM)

$7.2 BILLION

Global Interior Painting Market

Source: Grand View Research, 2023

6.5% CAGR
Projected market growth through 2030

$3.1B+
North American market opportunity

Millions
of units painted annually in target segments

GLOBAL INTERIOR PAINTING MARKET SIZE
(USD BILLION)

Strong growth driven by construction activity, labor shortages, and automation adoption.

MARKET DRIVERS

Labor Shortage
Paint contractors face ongoing labor constraints and rising costs.

Rising Labor Costs
Labor costs continue to increase, driving demand for automation.

Construction Growth
Continued growth in residential and commercial construction.

Tech Adoption
Contractors are seeking innovative solutions to improve productivity.

Building the Future of Painting.

RoboRoll is executing a clear roadmap to scale impact, expand markets, and drive long-term value.

OUR MISSION

To automate the most repetitive work in construction—starting with painting—and build a world-class robotics platform for the built environment.

PRODUCT ROADMAP

1. BUILD
(2024)

- Complete beta units
- Field testing in real jobsite conditions
- Iterate based on customer feedback

2. VALIDATE
(2024–2025)

- Expand pilot programs
- Validate ROI and reliability
- Refine hardware and software

3. SCALE
(2025–2026)

- Begin limited production
- Scale manufacturing and supply chain
- Grow sales and service team

4. EXPAND MARKETS
(2026–2027)

- Expand beyond apartments into commercial, new construction, and facilities
- Strategic partnerships and channel growth

5. LEAD THE INDUSTRY
(2027+)

- Continuous innovation
- Expand globally
- Build the operating system for jobsite robotics

2024 — 2024–2025 — 2025–2026 — 2026–2027 — 2027+

RISKS & MITIGATIONS

Technical Complexity
Mitigation: Modular design, rigorous testing, and continuous iteration.

Adoption Hesitation
Mitigation: Demonstrate ROI, ease of use, and provide training and support.

Supply Chain Delays
Mitigation: Diversify suppliers and maintain safety stock of critical components.

Cost Pressures
Mitigation: Optimize manufacturing processes and drive economies of scale.

The Next Step

We are raising capital to accelerate production, expand our team, and bring RoboRoll to more jobsites—faster.

Let's build the future, one coat at a time.
